Ubias, Zachary James

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2015-2016

Unique Reference:

The documents are stored in the [\[GitHub Repository Link\]](#).

[\[File Reference in GitHub, preferably link.\]](#)

Document Purpose:

The purpose of this document is to give a clear understanding on how the use-case [Search Events](#) works for different possible alternative flows there are.

Target Audience:

This documents aim to target possible users of the project, the client, and developers interested in making a project similar to this.

Revision Control

History Revision:

| Revision Date | Person Responsible | Version Number | Modification |
|--------------------------|-------------------------------|---------------------------|--|
| 08/16/15 | Camille Bacister | 1.0 | Initial Document; Flow of Events |
| 08/16/15 | Mika Lenon | 1.1 | Added and updated flow of events, and other conditions |
| 08/16/15 | Zachary Ubias | 2.1 | Created activity diagram |

Use-Case Name: 2.1 Search Events

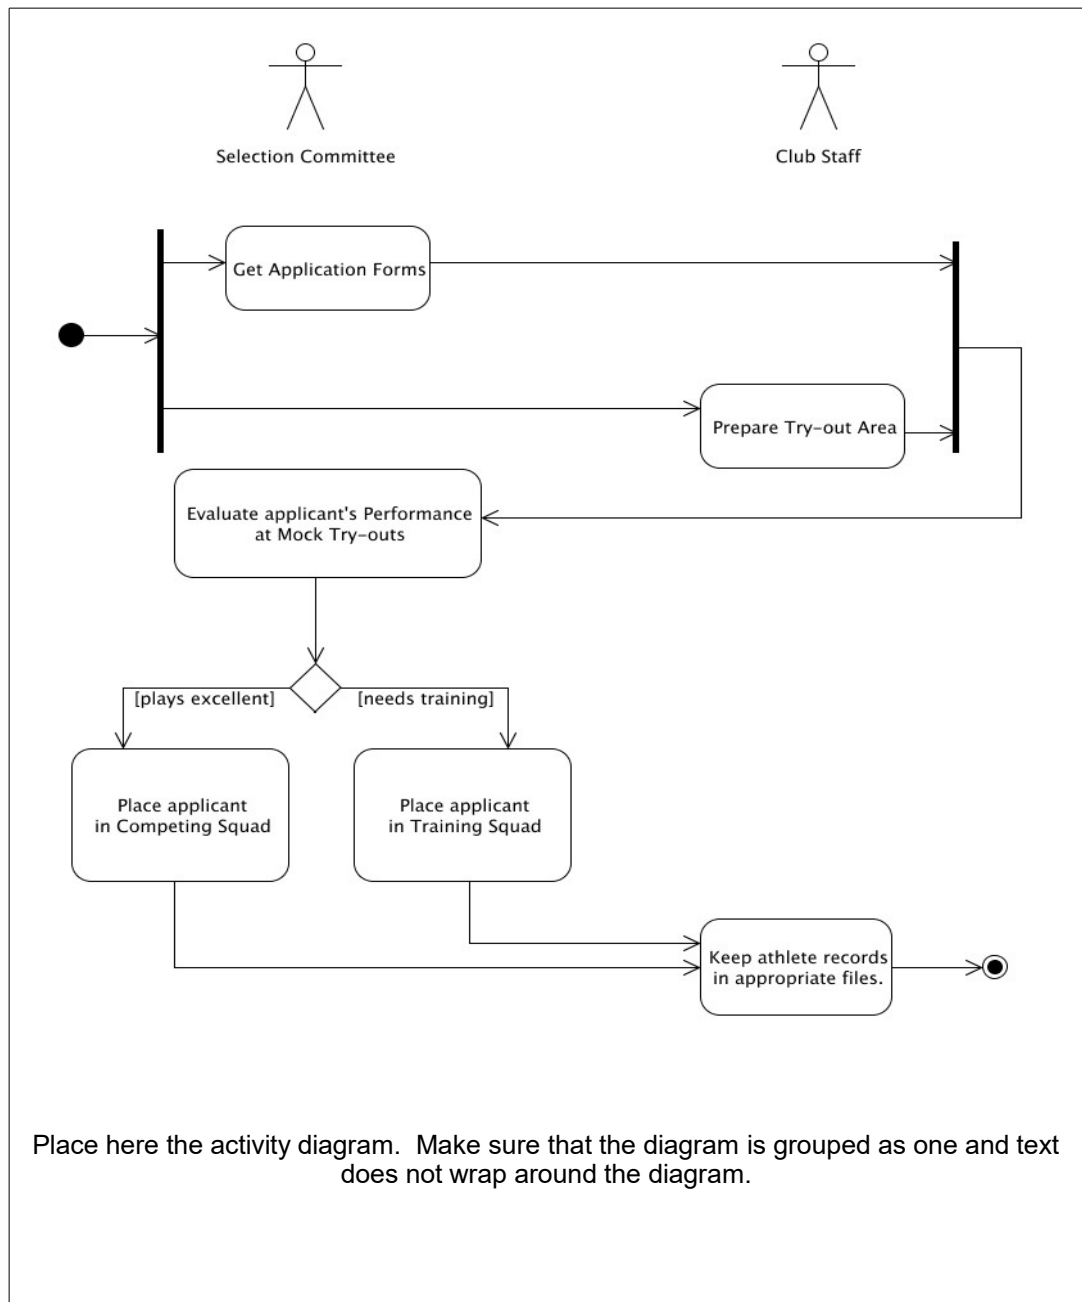

Description: Search Events is a major functionality under the users and event owners. Anyone who downloaded the application can search for different events around UP. Events of particular categories such as performance, film, organization, competition, and food can also be seen through this use-case.

Preconditions: NONE

Flow of Events:

| Scenario Name | Description |
|---|--|
| Scenario 1 (Basic Flow) Shows the a series of results | 1. Users search the event using a general name. 2. The system displays a number of events with that general name. 3. The system can also display a series of results even if the guest user typed the name of the event itself if there are events with the same name. |
| Scenario 2 There is no event with the name you are searching | 1. Users may search the event by searching it's name 2. Users misspelled the name of the event 3. The application can't find it. |

Activity Diagram of the Flow of Events:

Place here the activity diagram. Make sure that the diagram is grouped as one and text does not wrap around the diagram.

Postcondition: Shows a message saying “No <event he typed> event is found”

Relationships: None

Special Requirements: None
