The documents are stored in the <https://github.com/Zhalen/event-sharing-app>
<https://github.com/Zhalen/event-sharing-app/blob/master/02-Requirements%20Engineering/9%20-%20Sincronize.pdf>

Document Purpose:

The purpose of this document is to give a clear understanding on how the use-case Synchronize works for different possible alternative flows there are.

Target Audience:

This documents aim to target possible users of the project, the client, and developers interested in making a project similar to this.

Revision Control*History Revision:*

Revision Date	Person Responsible	Version Number	Modification
08/16/15	Camille Bacister	1.0	Initial Document; Flow of Events
08/16/15	Mika Lenon	1.1	Added and updated flow of events, and other conditions
08/16/15	Zachary Ubias	2.1	Created activity diagram

Use-Case Name: 9.1 Synchronize

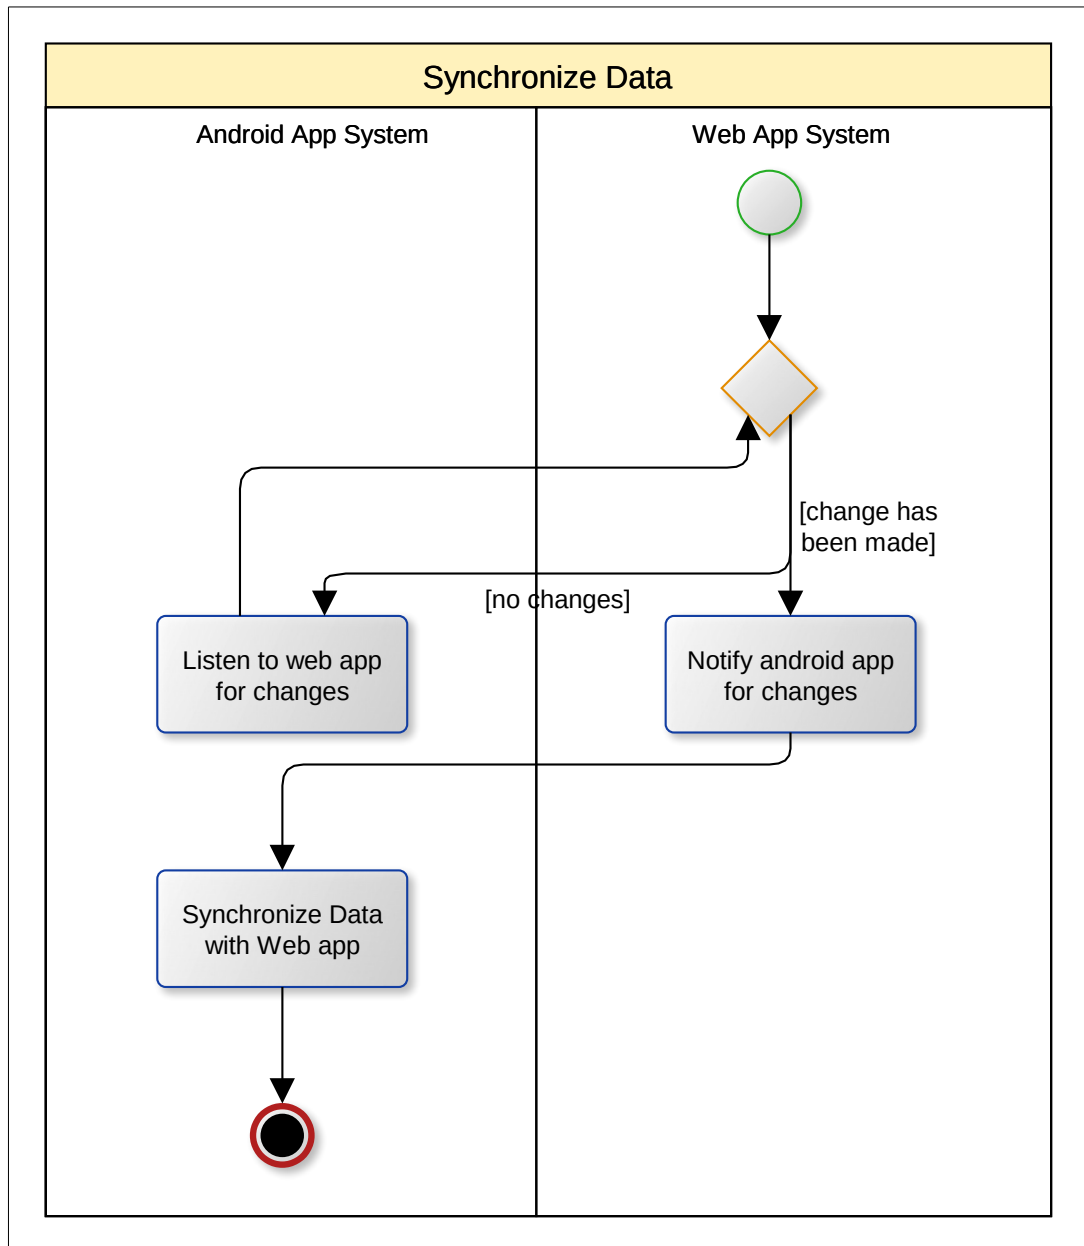

Description: Sync local Database with the Web Application's Database. Changes are only done by the event owner and administrator.

Preconditions: None

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow)	1. Web app notifies the android app system on changes [in realtime]. 2. Synchronize android app database with the web app's database.

Activity Diagram of the Flow of Events:

Postcondition: NONE

Relationships: NONE

Special Requirements: NONE
