Unique Reference:

The documents are stored in the <https://github.com/Zhalen/event-sharing-app>
https://github.com/Zhalen/event-sharing-app/blob/master/02-Requirements%20Engineering/6%20-%20Drop_Submission_Event.pdf

Document Purpose:

The purpose of this document is to give a clear understanding on how the use-case Drop Event Submission works for different possible alternative flows there are.

Target Audience:

This documents aim to target possible users of the project, the client, and developers interested in making a project similar to this.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
08/16/15	Camille Bacister	1.0	Initial Document; Flow of Events
08/16/15	Mika Lenon	1.1	Added and updated flow of events, and other conditions
08/16/15	Zachary Ubias	2.1	Created activity diagram

Use-Case Name: 6.1 Drop Event Submission

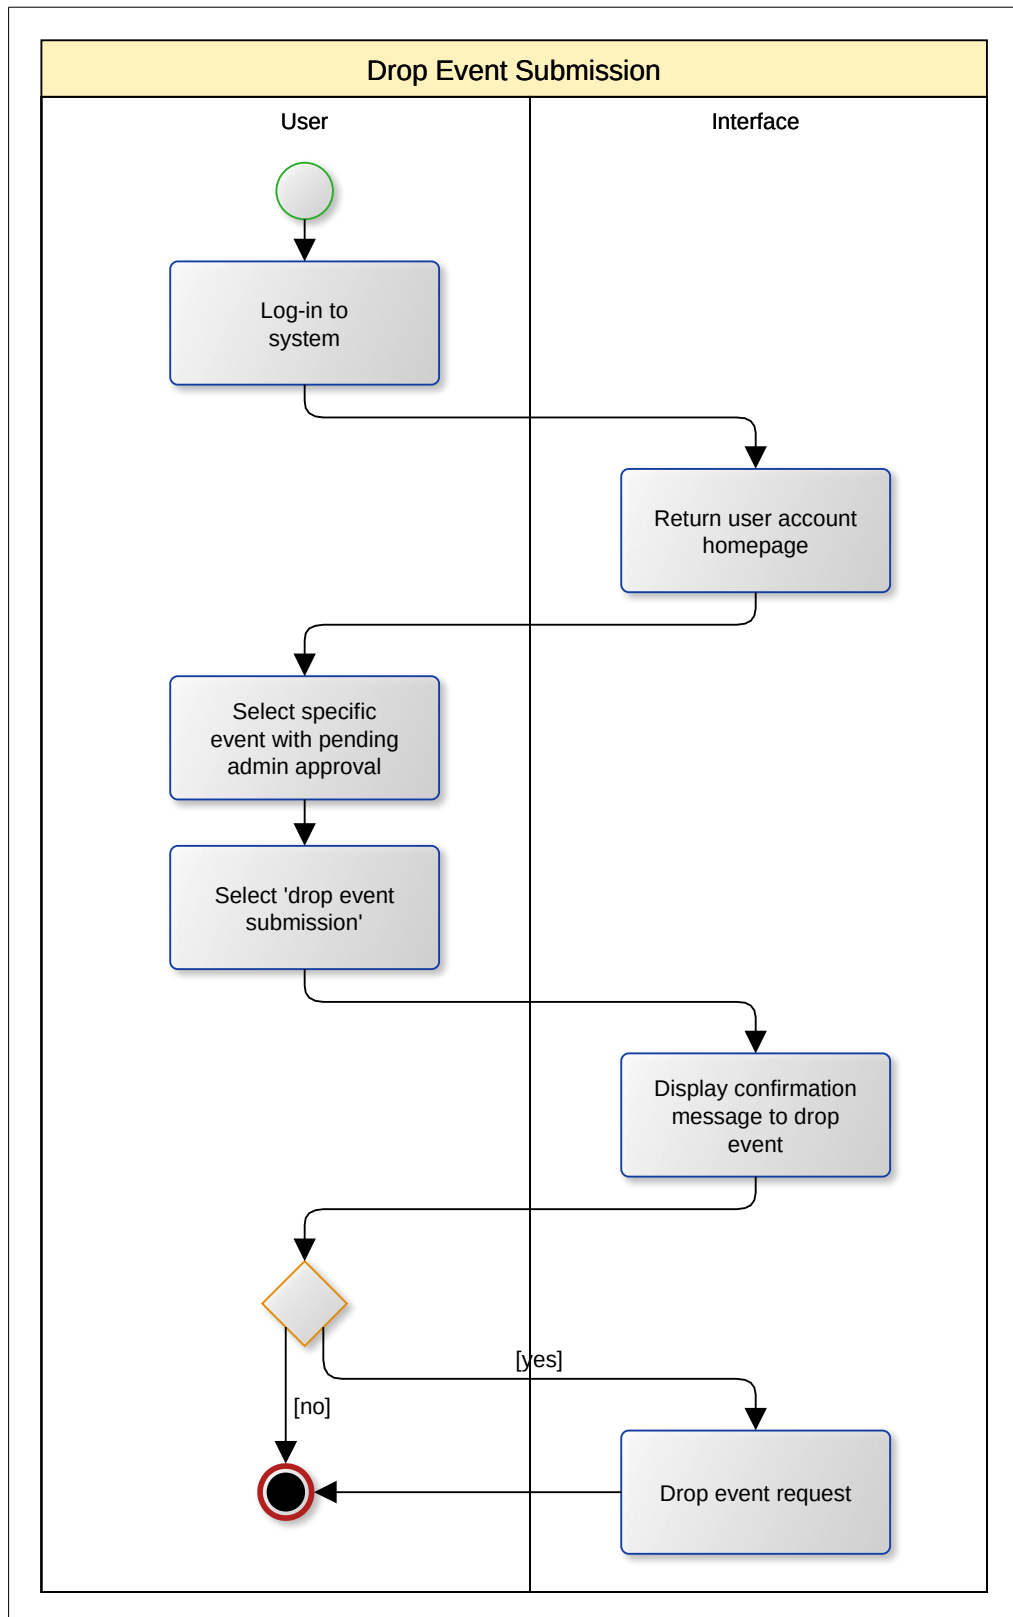

Description: Drop Event Submission is a counter-part use-case for creating an event that is under the event owner. The event owner cancels an event with pending approval from the administrator.

Preconditions: The user must be logged in.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Confirm action	1. When the event owner wants to cancel pending event due to changes or incorrect informations, he clicks the cancel button. 2. The event owner chose to cancel the pending event, he confirms the action and successfully deletes it.
Scenario 2 Cancel action	1. When the event owner wants to cancel pending event due to changes or incorrect informations, he clicks the cancel button. 2. If ever the event owner just accidentally clicked the Cancel Event button, or clicked the cancel button but chose not to pursue it, the event owner has a chance not continue the action.

Activity Diagram of the Flow of Events:

Postcondition: *Go back to the previous state*

Relationships: *NONE*

Special Requirements: *NONE*
